

SIMPLIFY MIGRATION PROJECTS WITH ALCHEMIZE

It is not uncommon for large companies to change their database platforms for a variety of reasons like better security, more reliable technology and better prices. But migrations are traditionally a time consuming and error prone

process. That's why we developed Alchemize as an automated solution. Alchemize is a data management platform that specializes in quick and efficiently migrating data, streaming cloud modernization or converting from one system to another.

Alchemize is a very powerful and multifaceted data management tool that automates the manual process of managing data. It is unique

because it uses a holistic approach to problem-solving. By self-teaching the entirety of the DBMSs and applications involved, Alchemize provides transparency and access to perform the most difficult and time-consuming data management projects with just a few clicks of a button. In addition, this whole system approach allows for uses throughout the information lifecycle.

MIGRATION DRIVERS

- Mergers and Acquisitions
- Application Conversion
- Facility Reduction
- Divestiture
- Database Replatforming
- End of Lease
- Cloud Modernization
- Facilities Upgrade
- End of Facility
- System Conversion

WHY ALCHEMIZE?

- Alchemize is the most cost-efficient tool in its class for data migration projects.
- Alchemize is system and application agnostic.
- Alchemize performs at near-zero system downtime.
- From system analysis, through transformation and finally to migration, Alchemize offers "Eventually Consistent" for speed and accuracy. Or "Always consistent" to ensure accuracy and accessibility at any moment in time... in other words, the system is never broken.
- Alchemize learns any system, regardless of customizations.
- By automating the manual processes involved Alchemize increases efficiency by 80%.
- Alchemize automates the generation of the rulesets needed to transform and migrate data.
- Rulesets are easily augmented or created from within Alchemize.
- Alchemize stores projects in the Reusable Ruleset Library for future use, increasing efficiency beyond 80% on repetitive processes, while reducing the need for typical project rework.
- Automation simplifies and dramatically reduces risk. It even has an UnDo button.

Any platform, any database, or any system... Just Let Alchemize Do It!
