

# IT'S TIME TO MOVE TO MAXIMO WITH ALCHEMIZE

Maxis Technology has tailored its core Maximo offerings around our Alchemize flagship product. This approach allows us to focus on doing what we do best – managing and handling data more efficiently and reliably, with streamlined repeatable processes using no-code solutions, for quicker project deliveries and an overall time savings of up to 80%!

With Alchemize, our AI data application, moving to Maximo has never been easier. Alchemize manages and handles data more efficiently and reliably, without antiquated ETL and script migrations. The normally tedious and time-consuming tasks like discovery, mapping and migration are all automated by Alchemize.

## Other Maximo Solutions include:

-  Maximo Cloud Migration
-  Maximo Upgrades
-  Maximo Data Archiving
-  Maximo Database Replatforming
-  Maximo Systems Merging
-  Competitive EAM Conversions to Maximo
-  Maximo Database Backup/  
Restore and Mirroring
-  Integrations and Data  
Warehouse Synchronization
-  Maximo Data Loading, Transformations  
and Standardization
-  Acquisitions, Divestitures, Phased  
Implementation Rollouts and  
Standardized Maximo Deployments

## WE ARE MAXIS TECHNOLOGY

Maxis Technology is dedicated to providing solutions-based services for complex database management projects in a rapidly evolving technology landscape. With 11 years of company history and over 100 combined years of problem-solving and industry experience at the helm, we understand the challenges businesses face. From aggressive timelines and cloud migrations, to limited budgets or internal staffing expertise, we meet challenges head-on to eliminate problems before they arise.

**Proven experience, cutting edge AI tools, our methodology processes – that’s the Maxis Technology difference.**

## THE REPLATFORM WIZARD

By integrating our proprietary Alchemize enterprise data tool across our data management services portfolio, we solve the most historically difficult and frustrating problems. Alchemize removes the human element to systematically automate data and migration activities. Most importantly, Alchemize offers the flexibility to accommodate inherent changes which can occur in project requirements, scope, or when you need to revert or re-do select components. By reducing, or removing these impact factors, we streamline projects for better overall execution, with time reduction up to 80% of traditional project approaches.

Tired of time-consuming performance, larger cost factors and higher risk project areas?

**Just let Alchemize do it.**

### Unleash the Full Potential of Your Data with Alchemize:

-  Replatform
-  Merge disparate systems
-  Segment
-  Synchronize systems
-  Integrate
-  Archive
