

MINIMIZE RISK OF DATA TRANSFORMATION WITH THE AUTOMATION OF ALCHEMIZE

Alchemize, simply stated, reinvents how modern data project challenges are solved. The brainchild of the folks at Maxis Technology, Alchemize was developed leveraging decades of experience into an innovative, AI enterprise data management application that removes the human element from the data transformation processes. It systematically automates all aspects of data discovery, migration and reporting for entire databases of any size.

Alchemize offers an unmatched level of flexibility enabling operational efficiencies across a broad range of sectors. Business mergers and

acquisitions, divestitures, retiring legacy applications to implement improved software, sharing data with multiple applications and archiving non-productive data are just a few of the reasons enterprises depend on Alchemize.

Most importantly, Alchemize offers the flexibility to accommodate inherent changes which can occur in project requirements, scope, or when you need to revert or re-do select components. By reducing, or removing these impact factors, we streamline projects for better overall execution, with cost and time reductions up to 80% of traditional project approaches.

ALCHEMIZE DATA SERVICES

Maxis Technology offers Alchemize support services to ensure a successful implementation. Organizations have access to experts to accelerate projects by guiding them through the project, complementing the organization's existing team, or by providing complete project management.

Any platform, any database, or any system... Just Let Alchemize Do It!

DO MORE WITH ALCHEMIZE:

-  Replatforming
-  Cloud Modernization
-  Data Archiving
-  Data Migration
-  Data Transformation
-  Data Conversion
-  Integrations
-  Data Quality Analytics
-  Acquisitions & Divestitures
-  Environmental Syncing

WHY ALCHEMIZE?

ERROR-FREE DATA TRANSFORMATION

No data is lost
No data is damaged
Proven Methodology

REPEATABLE

Data integrity is maintained
Eliminates human error
Ensures data reliability

AUTOMATION

Automatic analysis of data
No manual script writing
Dynamic ERD produces
Executable code

FAST DATA TRANSFORMATION

Automation saves time and manpower
Map data automatically
Transform data in hours, not days
