STREAMLINE YOUR UPGRADE WITH PRECISION

Maxis Technology delivers a sophisticated service to empower your transition to IBM Maximo Application Suite (MAS) 9.X. Our **Alchemize Catalyst Suite (ACS)**, fueled by advanced AI and deep Maximo expertise, crafts a precise roadmap for your customizations. We evaluate your unique environment to recommend retaining custom code, converting to automation scripts, or adopting out-of-the-box (OOB) MAS 9.1 features. Tailored Alchemize context packets and expert human validation ensure recommendations align seamlessly with your business objectives, driving an optimized upgrade.

OUR PROVEN 6-STEP APPROACH

1 **Secure File Upload:** Upload custom class files effortlessly via our secure portal.

2 **AI Analysis with Tailored Context:** Our machine learning engine, enriched with environment-specific Alchemize context packets, deeply evaluates each file.

3 **Data-Driven Complexity Report:** Receive a detailed report scoring customization complexity to prioritize planning.

4 **Actionable Recommendations:** Obtain a clear roadmap to adopt OOB features, automation scripts, or optimized solutions.

5 **Expert Human Validation:** Seasoned Maximo professionals review AI findings for accuracy and strategic alignment.

6 **Smooth Transition:** Alchemize's robust data management ensures an efficient upgrade with minimal manual effort.

VALUE THAT DRIVES SUCCESS

Feature	Technical Description	Key Business Benefit
Automated Analysis	Machine learning swiftly identifies and categorizes customizations.	Cuts analysis time from weeks to hours, freeing technical resources.
Recommendation Engine	Proposes optimal modernization paths based on MAS 9.1 capabilities.	Provides a clear, data-driven upgrade plan, reducing rework.
Complexity Scoring	Assigns quantifiable scores to customization complexity for planning.	Enables accurate effort estimation and reliable project timelines.
Alchemize Integration	Utilizes Alchemize for seamless data handling during upgrades.	Ensures data integrity and a streamlined transition.
Tailored Context	Incorporates Alchemize context packets specific to your setup.	Delivers recommendations precisely aligned with operational needs.
Human Validation	Combines AI speed with expert review for validated outcomes.	Instills confidence in a reliable upgrade strategy.

ABOUT ALCHEMIZE

The Alchemize Catalyst Suite (ACS), an extension of our flagship Alchemize platform, excels in simplifying complex data transformations. Renowned for reducing project timelines by up to 80% while maintaining data integrity, ACS leverages tailored context packets, AI-driven analysis, and human expertise to deliver unmatched efficiency for your Maximo 9.X upgrade.
